SUMMARY

Starting my journey in crafting 3D assets for simulators and terrains. After a spark of passion for creating procedural modelling scripts for large-scale terrains, I am driven to bridge the domains of design and code to deliver solutions to transform and innovate lives and industries.

My unique blend of technical expertise and artistic creativity leads to solutions that are functional and visually appealing.

WORK EXPERIENCE

Software Applications Developer | NTT Ltd

NTT, a Fortune Global 500 Company, is a Technology and Business Solutions Provider

📅 Sep 2021 - Present 📍 Singapore

- "Recognition for Excellence" was awarded by the company for proactive leadership in organizing and advancing projects and achieving successful outcomes.

- Revamped the development of new ETL workflows, leading to a 50% increase in issue resolution and workflow creation efficiency improved by 25%.

- Full-stack Typescript developer for Armed Forces **Enterprise Safety Information System (ESIS)** integrated with **Safe Guardian** Mobile Application for the SAF consolidation and analysis of Safety Incidents.

- Developed and delivered Email Management features which are used across all branches of the Armed Forces enabling efficient email broadcasting for many modules residing in ESIS.

Skills: JavaScript · Node.js · React.js · Express.js · Oracle Database · Informatica ETL

Software Engineering Student | General Assembly

📅 Nov 2020 - Jun 2021 📍 Singapore

- Building strong foundational knowledge in full-stack web development using modern stacks and frameworks.

Skills: MongoDB · Express · Node.js · React.js · Django · PostgreSQL

Terrain Engineer | ST Engineering, Training and Simulations

ST Engineering is a global technology, defence and engineering group

 Nov 2017 - Sep 2021  Singapore

- Led a team of three 3D modellers in 2020 to deliver and integrate multiple large-scale 3D terrains
- Created procedural modelling scripts to build and automate processes to scale terrain production from 1km sq to 5km sq.
- Initiated changes in asset workflow such as an asset management system, which led to an improvement of production time by 1/3.

Skills: 3DS Max · Photoshop · maxscript · C++ · Unity3D

3D Modeler | ST Engineering | Internship

 Sep 2016 - Feb 2017  Singapore

- "Letter of Appreciation" awarded for the work and effort recognised by the Company.

CERTIFICATIONS

Cyber Security for ICT Professionals

NUS-ISS
Issued: Mar 2024

ICT Assessment Certification for Software Developer

NUS-ISS
Issued: Jan 2024 | Expires: Jan 2027

AWS Certified Cloud Practitioner

AWS
Issued: Nov 2022 | Expires: Nov 2025
Certification ID: ZHF21F7CYN4E1H3E

EDUCATION

Software Engineering Immersive

General Assembly

B.F.A, Digital Art and Animation

Digipen Institute of Technology

Diploma in Digital Media Design (Animation)

Nanyang Polytechnic

SKILLS

HTML5	CSS	JavaScript	TypeScript
Bootstrap	Python	React	Express
Node	SQL	Oracle Database	MongoDB
Git	Jenkins	Agile	SDLC
JIRA	REST APIs	OWASP	Web App Security
